PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science and Artificial Intelligence student with a strong foundation in Java, Python, SQL, DBMS, and software development principles. Passionate about building practical applications, solving real-world problems, and continuously learning new technologies. Seeking an entry-level role where I can apply my technical skills, contribute to meaningful projects, and grow as a software professional.

EDUCATION

Malla Reddy University

Bachelor of Technology CSE-AIML; GPA: 8.70

Hyderabad, India

August 2023 – Present

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL

Core Concepts: Computer Networks, DBMS

Web Technologies: HTML, CSS, JavaScript, React

Databases: MySQL, MongoDB

Tools: Git, GitHub, VS Code, Postman

PROJECTS

Disaster Management System

- Developed a full-stack Disaster Management System for real-time disaster reporting and emergency response coordination.
- Implemented user authentication, incident tracking, emergency alerts, and resource management features using modern web technologies.
- Built responsive frontend interfaces and integrated backend APIs for efficient communication and data handling.
- Utilized MongoDB and MySQL for storing disaster reports, rescue requests, and emergency contact information securely.

DeepStock: Neural Forecasting for Smarter Trading

- Built an AI-powered stock market prediction platform using neural networks and deep learning techniques.
- Implemented LSTM-based forecasting models to analyze historical stock data and predict future market trends.
- Developed interactive dashboards with real-time charts, prediction visualization, and technical indicators.
- Integrated backend APIs and database systems for seamless data processing and trading analytics.

CERTIFICATES

EduSkills Data Engineering Virtual Internship

- Successfully completed a virtual internship focused on Data Engineering concepts, cloud technologies, data pipelines, and database management.

AWS Cloud Practitioner Essentials

- Learned core AWS Cloud concepts including cloud architecture, security, pricing, and AWS services.

AWS Cloud Foundations

- Gained foundational knowledge in cloud computing, AWS infrastructure, storage, networking, and deployment services.
